

BUSINESS SOLUTIONS

FOR BUSINESSES WITH MORE THAN 25 SEATS

ENJOY SAFER TECHNOLOGY™

Whether your business is just starting out or is established, there are a few things that you should expect from the security software you use daily. At ESET, we feel that running security software in the business environment should be easy and simple. That's why we have created ESET Business Solutions, a perfect match for your 25+ seat business – utilizing over 25 years of pioneering experience in the anti-malware industry.

3 Great Reasons to Choose ESET Business Solutions

1. Simple and Straightforward

With ESET Business Solutions you can mix and match endpoint protection according to your actual needs, deploying it on a range of platforms (Windows, Mac, Linux and Android) and devices: computers, smartphones, tablets, and servers.

2. Light on Your System

Our solutions are built for small footprint, which also makes them suitable for older hardware, saving IT-related costs on hardware upgrades. In addition, program updates are small and can download from a central mirror server.

3. Easy to Manage

Easily deploy, configure and manage your security software from a single console. Just one person, using ESET Remote Administrator, our web-console, can oversee all your IT security. What's more, ESET License Administrator, also accessible via web-console, means you can view and manage all your licenses cost-effectively in real-time, from one location.

Find the Right Solution for You

							
	ENDPOINT ANTIVIRUS	MOBILE SECURITY	VIRTUALIZATION SECURITY	FILE SECURITY	ENDPOINT SECURITY	MAIL SECURITY	GATEWAY SECURITY
ESET ENDPOINT PROTECTION STANDARD	■	■	■	■	■	■	■
ESET ENDPOINT PROTECTION ADVANCED	■	■	■	■	■	■	■
ESET SECURE BUSINESS	■	■	■	■	■	■	■
ESET SECURE ENTERPRISE	■	■	■	■	■	■	■

ENDPOINT PROTECTION STANDARD

Keep your network clean and protect your endpoints (computers, smartphones, tablets, and file servers) against emerging threats. ESET Endpoint Protection Standard provides essential protection for your company network that is easily manageable from a single console.

ENDPOINT PROTECTION ADVANCED

In addition to ESET Endpoint Protection Standard, the Advanced version comes with the powerful Web Control, Firewall and Antispam filter to provide additional layers of protection for your company network and your mobile workforce.

SECURE BUSINESS

Eliminating email-borne threats at the server level, ESET Secure Business gives your company's data an extra level of security that complements the protection of computers, mobile devices and file servers.

SECURE ENTERPRISE

Choose this option if you operate your own Internet gateway server to safeguard your HTTP and FTP communications. In addition, ESET Secure Enterprise gives you all the products and tools for the maximum level of protection on your endpoints and servers across multiple platforms.

Endpoint Antivirus

ESET Endpoint Antivirus for Windows

ESET Endpoint Antivirus for OS X

ESET NOD32 Antivirus Business Edition for Linux Desktop

Antivirus and Antispyware	Eliminates all types of threats and spyware.
Anti-Phishing	Protects end users from fake websites' attempts to acquire sensitive information.
Virtualization Support	Stores metadata from already scanned files in the virtual environment for boosted scan speed.
Exploit Blocker	Bolsters the security of applications such as web browsers, PDF readers and more.
Advanced Memory Scanner	Monitors the behavior of malicious processes and scans them once they decloak in the memory.
Host-Based Intrusion Prevention	Enables you to define rules for processes, applications and files.
Device Control	Blocks unauthorized CDs/DVDs and USBs from your system.
RIP & Replace	Other security software is detected and uninstalled during the installation of ESET solutions.
Low System Demands	Leaves more system resources for programs you use daily.

Mobile Security

ESET Endpoint Security for Android

ESET Mobile Device Management for Apple iOS

Real-Time Protection	Shields all applications and files in real-time using ESET NOD32® proactive technology.
Anti-Phishing	Protects users against fake websites trying to acquire passwords, banking data and other sensitive information.
Application Control	Offers administrators the option to monitor installed applications, block access or block defined applications.
Anti-Theft	Protects mobile phones with Remote Lock, Remote Localization, Remote Wipe and more.
Device Security	Provides admins with options to execute basic security policies across your mobile device fleet.
SMS & Call Filter	Protects users from unwanted calls and SMS messages with a wide range of customization options.
iOS Mobile Device Management	Strengthen the security by setting Passcode, iCloud, Privacy and Device settings and restrictions remotely, including Anti-Theft.
Remote Management	Provides admins with an overall network security overview – via a single web-based console.

Virtualization Security

ESET Virtualization Security for VMware vShield

ESET Shared Local Cache

ESET Virtualization Security for VMware vShield	Agentless protection of all VMs to provide high performance security that won't slow them down Uses vShield Endpoint technology to install a single ESET appliance on each host
ESET Shared Local Cache	Couples with an agent-based ESET solution to deliver multiple layers of protection One Shared Local Cache per hypervisor significantly boosts the scanning speed of VMs

File Security

ESET File Security for Microsoft Windows Server
ESET File Security for Microsoft Windows Server Core
ESET File Security for Linux/FreeBSD

Antivirus and Antispyware	Eliminates all types of threats including viruses, rootkits, worms and spyware.
Exploit Blocker	Bolsters the security of applications such as web browsers, PDF readers and more.
Advanced Memory Scanner	Monitors the behavior of malicious processes and scans them once they decloak in the memory.
Virtualization Support	Stores metadata of already scanned files in the virtual environment for boosted scan speed.
Native Clustering Support	Interconnect several nodes of ESET File Security within a cluster and manage them as one.
Storage scan	Easily set up on-demand scans of connected Network Attached Storage (NAS).
Windows Management Instrumentation (WMI) Provider	Monitors key functionalities of ESET File Security via the WMI framework, allowing for integration into third-party management and SIEM software.
Component-Based Installation	Choose which components to install for better optimization.
Low System Demands	Leaves more system resources for programs you use daily.

Endpoint Security

ESET Endpoint Security for Windows
ESET Endpoint Security for OS X

Antivirus and Antispyware	Eliminates all types of threats including viruses, rootkits, worms and spyware.
Anti-Phishing	Protects users against fake websites trying to acquire passwords and other sensitive information.
Virtualization Support	Stores metadata of already scanned files in the virtual environment for boosted scan speed.
Exploit Blocker	Bolsters the security of application such as web browsers, PDF readers and more.
Advanced Memory Scanner	Monitors the behavior of malicious processes and scans them once they decloak in the memory.
Vulnerability Shield	Detection of vulnerabilities and exposures on widely used protocols such as SMB, RPC and RDP.
Botnet Protection	Protects against botnet malware – preventing spam and network attacks launched from the endpoint.
Web Control	Limits website access by category, e.g. gaming, social networking, shopping and others.
Two-Way Firewall	Prevents unauthorized access to your company network and data exposure prevention.
Client Antispam	Effectively filters out spam and scans all incoming emails for malware.
Host-based Intrusion Prevention (HIPS)	Enables you to define rules for processes, applications and files.
RIP & Replace	Other security software is detected and uninstalled during the installation of ESET solutions.
Low System Demands	Leaves more system resources for programs you use daily.

Please note that functionality varies depending on operating system.

Mail Security

ESET Mail Security for Microsoft Exchange Server

ESET Mail Security for IBM Lotus Domino

ESET Mail Security for Linux/FreeBSD

ESET NOD32 Antivirus Business Edition for Kerio Connect

Antivirus and Antispyware	Eliminates all types of threats, including viruses, rootkits, worms and spyware. Filters out email-borne threats, including spyware at the gateway level.
Antispam	Stops spam and phishing messages with high interception rates.
Logs & Statistics	Spam log displays sender, recipient, spam score, classification reason and action taken. Greylisting log displays greylisted sender, recipient, action taken and status.
Smooth Operation	Automatically excludes critical server files from scanning, including Microsoft Exchange folders.

Gateway Security

ESET Gateway Security for Linux/FreeBSD

ESET NOD32 Antivirus Business Edition for Kerio Control

Antivirus and Antispyware	Eliminates all types of threats, including viruses, rootkits, worms and spyware.
Antispam	Stops spam and phishing messages with high interception rates.
Cross-Platform Protection	Eliminates malware targeting Windows, Mac and Linux operating systems.
Remote Administration	Allows you to remotely deploy, manage, and update all ESET security software in the company network.
Logs & Statistics	Spam log - Displays sender, recipient, spam score, classification reason and action taken.
Smooth Operation	Protects 3 in 1 – communication protocols, emails, and the server's file system.

Please note that functionality varies depending on operating system.

ESET Remote Administrator

Remote Administration	Manage servers, endpoints, smartphones and virtual machines from a single console.
ESET Remote Administrator Server	Handles communication with agents, collecting and storing application data in the database.
Independent Agent	All tasks, policies and events are run by an independent agent directly on the endpoint, even without connectivity to ESET Remote Administrator.
Web-Console	Allows network security to be managed from anywhere via web interface with drill-down possibilities.
ESET Remote Administrator Proxy	Collects and forwards aggregated data to the main server from remote locations without server installation.
Rogue Detection Sensor	Discovers unprotected and unmanaged machines in the network which require attention.
Multi-Platform Support	ESET Remote Administrator runs on both Windows and Linux machines, or as a Virtual Appliance.
Endpoints Deployment	All product installers are available from ESET servers and support caching on a web-proxy level to eliminate duplicate downloads in your corporate network.
Role-Based Management	Create multiple user accounts, each with customizable sets of privileges.
Secure Peer Communication	Utilized via the Transport Layer Security (TLS) 1.0 standard + own created and distributed certificates for peer identification.
Integrated ESET SysInspector	Via web-console, admin can track-back in time security incidents and system changes for particular endpoint based on the ESET SysInspector snapshots.

Please note that functionality varies depending on operating system.
