

# TOTAL PROTECTION SPHERE

## BASIC FEATURES

- Antivirus and antispysware
- Email protection, Web protection
- Intelligent firewall
- Data encryption and shredding
- Device access controls
- Creation of a recovery boot disk
- PC optimalization
- AntiExploit

## All-round computer protection

Multiple layers of antivirus protection stop malware coming in from the online world as well as from other sources like flash drives. All the entry points of the computer are checked.

## Data safe

Both online and offline encryption are here to prevent disclosure of your private or business data, yet are still easily accessible.

## Access management

The software enables assigning different access rights to different devices, e.g. flash drives, external drives, card readers and so on. It is easy to find a specific device by its category or by the type of its connection.

## TOP BENEFITS

- Protected data
- All entry points secured
- Silent operation
- Easy setting up

## DOUBLE ENGINE SET

At the core of the antivirus, two scanning engines work in accord. The data is handed over seamlessly from one engine to the other. Detection rates are comparatively extremely high.

## SHIELDED FROM ONLINE THREATS

Permanent scanning of files to be opened is a must, preventive scanning in predefined intervals is a standard. In addition to this, online protection discards malware before it can reach your computer, be it from the web or by email.

## PERSONAL FIREWALL

All incoming and outgoing connections are monitored, and unwanted applications are prevented from establishing a connection.

## PARENTAL LOCK

A web filtering module provides a protected environment for children and teenagers online. It blocks predefined content categories, according to your settings.

## ARCHIVE ENCRYPTION

When dealing with sensitive data that needs to be archived, this feature comes in handy. Archive your files and folders with a click of the mouse.

## DRIVE ENCRYPTION

When you work with private data on a daily basis, you need the data to be perfectly protected, yet always available. Create a virtual encrypted drive, log in once, and work with your sensitive data the same way you would with any other files or folders.

## OPTIMA – OPTIMIZE YOUR PC

- Cleans temporary directories
- Cleans registry
- Optimizes file access

## ANTIEXPLOIT

- Superior shield looking over your most critical and vulnerable applications
- Blocks exploit kits in the browser and in the most frequently misused software
- Prevents downloading of malicious software
- Zero-days attacks protection

## PORTABLE TOOLS

As part of the standard license, you may generate up to five portable versions of the antivirus on your flash drives or external hard drive. Also, a recovery boot disk can be easily created, either of these types:

- A plugin for Bart's Preinstalled Environment
- Windows Preinstallation Environment

## HINT

Should you require encryption and shredding tools without the antivirus part, try TrustPort Tools.

## MINIMUM SYSTEM REQUIREMENTS

CPU: Intel Pentium IV or compatible  
RAM: 512 MB  
HDD: 600 MB free space

## SUPPORTED OPERATING SYSTEMS

- Windows 10, 8, 7
- Windows Vista
- Windows XP

## LANGUAGES

Chinese, Czech, Danish, Dutch, English, French, German, Hungarian, Italian, Japanese, Polish, Portuguese, Russian, Spanish, Turkish, Ukrainian

## LICENSING

- 1 computer pack
- 3 computers pack
- 6 computers pack
